

Who do you agree with?
Explain why.

The potatoes weigh 13 kg

Amir

We don't know how much
the potatoes weigh because
the number is hidden.

Jack

The potatoes weigh more
than half of 10 kg

Rosie

Can you calculate the weight of the
potatoes? Explain how you did it.

Amir is wrong -
he has counted on
3 from 10 kg when
he should have
counted back 3 kg.

Jack is wrong
because we can
work out the scale
by using the 10 kg
and counting back.
They weigh 7 kg.

Rosie is correct
because half of 10
is 5 and the arrow
is past where 5 kg
would be.

The weight of the
potatoes is 7 kg
