Classification

What does 'to classify' mean?

In what ways do we classify animals?

You can also classify animals by what they eat. Some animals only eat plants. They are called **herbivores**.

'herba' means 'green plants' in Latin, so 'herbivore' means 'green plant eater'.

Some animals only eat meat. They are called **carnivores**.

What do you think 'carni' means?

Some animals eat plants and meat. These animals are called **omnivores**. The word 'omni' means 'all' in Latin.

What do you think a human is?

A human is _____ because

Sorting time!

They eat **grasses**, small **plants**, bushes, fruit, **twigs**, **tree bark**, and roots.

They eat **fruits**, **vegetables** and **grass**.

Tigers eat a variety of prey ranging in size from **termites** to **elephant calves**

They eat **animals**, **insects**, **snails**, **eggs** of birds.

Humans eat **vegetables, fruits, grains, nuts, eggs and meat.**

They eat **small mammals, birds, reptiles, frogs, eggs, insects, worms, fish, crabs, fruits, berries, vegetables, seeds.**

Now, we are going to look at how animal habitats are suited for animals' needs and survival.

We are going to learn about three different bears!
Watch the film.

A polar bear is suited to its habitat because _____
_____.

A panda's habitat is _____

It is suited to its habitat because _____
_____.
