

Here is a Rekenrek made from 100 beads.

If the Rekenrek represents one whole, what fractions have been made on the left and on the right?

Can you partition both of the fractions into tenths and hundredths?

On the left, there are 46 hundredths, this is equivalent to 4 tenths and 6 hundredths.  
On the right, there are 54 hundredths, this is equivalent to 5 tenths and 4 hundredths.

Children could also explore hundredths using a 100 bead string.

Complete the statements.

3 tenths and 2 hundredths = 2 tenths and  hundredths

12

14 hundredths and 3 tenths = 4 tenths and  hundredths

4

5 tenths and 1 hundredth < 5 tenths and  hundredths

Anything more than 1

5 tenths and 1 hundredth >  tenths and 5 hundredths

0, 1, 2, 3 or 4

Can you list all the possibilities?
