

Lesson 6: How does climate change affect the hajj?

Hajj is the pilgrimage that all Muslims must make once in their life to the city of Mecca in Saudi Arabia.

List the ways in which hajj has been a negative and a positive for climate change.

Negative effects on climate change	Positive effects on climate change
<ul style="list-style-type: none">- Lots of air conditioning is required because Saudi Arabia is such a hot country	<ul style="list-style-type: none">- Some people have been coming to hajj by alternative means to aeroplane such as bicycle
