

SCIENCE

ANIMALS INCLUDING HUMANS

WEEK COMMENCING 23RD MARCH

VOCABULARY

Oesophagus: the scientific name for the food pipe

Stomach: a bag of muscle used in the first part of digestion

Small intestine: the thin tube where broken down food is absorbed

Large intestine: absorbs water and stores undigested food

LEARN

- Visit the following website on BBC Bitesize: <https://www.bbc.co.uk/bitesize/topics/z27kng8>
- On that page, you will find 5 learner guides: What is the digestive system? What happens to food in your mouth? What are the types of teeth? What happens in your stomach? What happens in your intestines?
- Read through the 5 learner guides, watching any videos they have.
- You can take notes if you like.

YOUR TASK

In your work pack you will find your printed Animals Inc. Humans booklet we started in Science. Turn to lesson 3 and read the text at the top. Then, label the parts of the digestive system on the diagram.

Turn over the page and using the knowledge you have discovered, use scientific language to explain the human's digestive system. Don't forget to use the word bank above!
