

Please draw this on some paper at home, so that your child can practice writing their number bonds to 10. I have completed an example at the top! I recommend singing the song as you work to help remind them ☺. Don't forget, you can always practice first with their 10 blocks, objects or legos! As an extra challenge, you can see if they can also write a number sentence!

Challenge: 9 + 1 = 10
