## Worksheet 5

### Describing Movements

- 1 A parallelogram is drawn on a square grid.

Describe the translation of parallelogram JKLM that results in:

- (a) Point J moving to (4,7):

1 unit to right and 1 unit downwards

- (b) Point K moving to (10,4):

4 units right and 4 units downwards

(c) Point L moving to (10,0):

5 units right then 5 units downwards

(d) Point M moving to (5,2):

3 units right then 3 units downwards

2 A triangle is drawn on a square grid.

Describe two different translations which move the triangle XYZ so that one of its vertices ends up at (6,3).

(a)

2 units to the right then 2 units downwards

(b)

4 units to the right then 2 units downwards OR  
3 units to the right then 4 units downwards
