

Name: _____ Class: _____ Date: _____

Worksheet 14

Solving Word Problems

Solve.

- 1 A fishing rod costs £34 and 30p.
Sam paid for it with a £50 note.
How much change did Sam get?

£50	-	£34 & 30p	=	£15 & 70p
-----	---	-----------	---	-----------

Sam got **£15 & 70p** change.

- 2 Hannah bought a handbag for £25 and 50p.
She gave the cashier two £20 notes.
How much change did she get?

£40 - £25 & 50p = £14 & 50p
She got £14 & 50p change.

- 3 Amira bought a pair of shoes and a skirt.
The pair of shoes cost £45 and 10p and the skirt cost £25.
After buying the items, she had £24 and 90p left.

- (a) How much did the two items cost?

$$\text{£45 \& 10p} + \text{£25} = \text{£70 \& 10p}$$

The two items cost £70 & 10p.

- (b) How much did Amira have to begin with?

$$\text{£70 \& 10p} + \text{£24 \& 90p} = \text{£95}$$

She had £95 to begin with.
