

Lesson 3: Plant Parts

- I can identify and name different parts of a plant.

Leaves come in different shapes and sizes.

Flower petals come in beautiful bright colours.

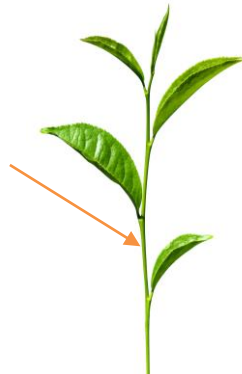

A flower

A bud

The **stem** supports the leaves and flowers

The **trunk** is the stem of a tree and used to make wood.

Roots grow downward and support the plant.

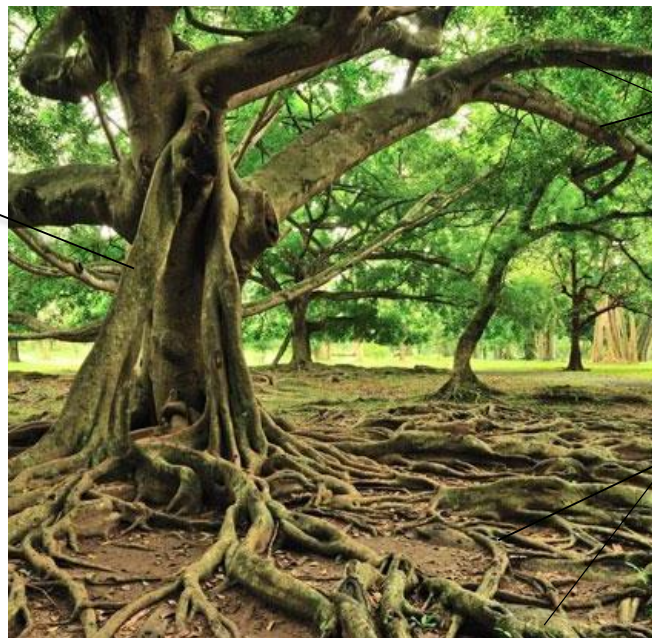

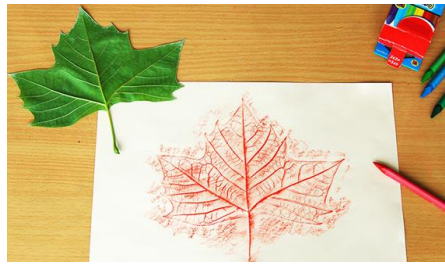

These are **branches** they are woody and joined to the trunk.

How many parts can you label?

Collect leaves of different shapes and sizes.

- Put your leaf upside down on a flat surface.
- Place a paper over the leaf.
- While holding the paper and leaf in place, use the side of a crayon to rub across the leaf.
- Rub all your leaves (one by one) using different colours.
