

**Lesson 6: I can explain how water is transported within a plant**

**Watch the video.**

**Now can you draw a diagram and label it, explaining how water is transported around a plant.**

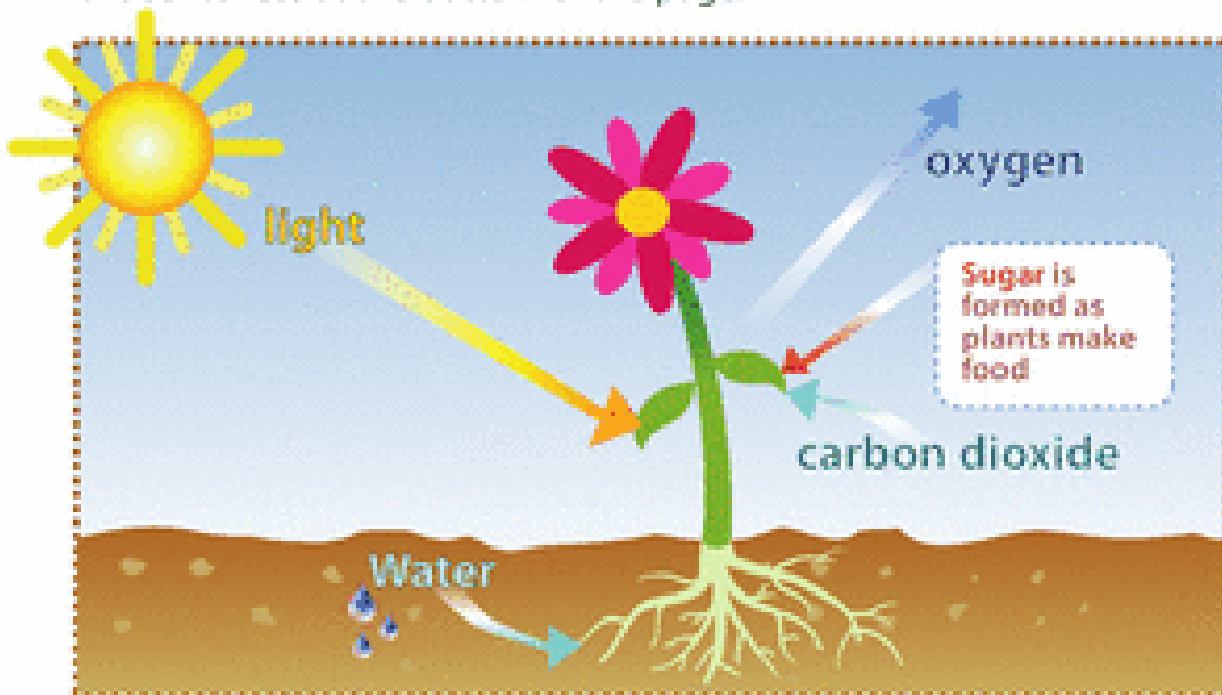

**Lesson 7: I can explain the process of photosynthesis**

Watch the video which explains the process of photosynthesis.

*What is*

# Photosynthesis

Study the picture below. Then use the diagram labels to complete the sentences at the bottom of the page.

Photosynthesis is a process that plants use to breathe and to make food. They use the \_\_\_\_\_ from the sun, along with \_\_\_\_\_ in the soil and a gas called \_\_\_\_\_ to make \_\_\_\_\_, which feeds the plant. During this process, \_\_\_\_\_ is released into the air.
